The Power of Anunta + Nutanix for the Modern Enterprise

Our Anunta–Nutanix Partnership

At Anunta, our partnership with Nutanix extends beyond reseller status. We are your trusted advisor for the full lifecycle of the Nutanix-driven enterprise cloud. Together we deliver:

End-to-End Delivery Capability

From assessment to migration, deployment, ongoing managed operations, and optimization.

Specialized Nutanix Offerings

Including HCI roll-outs, hybrid and multi-cloud integration, application modernization, Nutanix Kubernetes Platform (NKP), and Nutanix Database Service (NDB).

vSphere-to-Nutanix Migration

Accelerated, low-risk migration from VMware vSphere to Nutanix, with assessment, workload mapping, seamless cutover, and performance tuning.

Operational Excellence & Managed Services

Proactive Nutanix management with monitoring, optimization, and lifecycle support to keep your cloud platform continuously aligned to business needs.

Global Delivery with Local Touch

Global-scale Nutanix delivery backed by Anunta's region-savvy support and governance across APAC, India, and MENA.

VDI Expertise

Expertise across VMware Horizon, Azure Virtual Desktop (AVD), Accops, and Citrix, enabling secure, scalable, and high-performance virtual desktop environments.

What Can You Achieve with Anunta & Nutanix?

SEE NUTANIX IN ACTION

- Rapid deployment of enterprise-cloud architecture with minimal disruption.
- Accelerated migration of legacy workloads into a modern platform.
- Unlock NC2 agility on Azure and AWS with Anunta; your partner for smooth, zero-disruption cloud cluster deployments.
- Dramatic reduction in infrastructure management overhead and vendor sprawl.

©Anunta 2026

- Scalable, predictable performance, from data center to edge to cloud.
- Business-focused IT that enables new digital workspace models, DaaS, and hybrid-work strategies.
- A partner arrangement where you get ongoing value, not just a one-time project.

Nutanix Platform Highlights

Unified Infrastructure

Converged compute, storage, virtualization, and networking in a software-defined model that simplifies operations.

Hybrid & Multi-Cloud Reach

Deploy workloads on-premises, at the edge, and across public clouds, all managed through a single control plane.

Nutanix Cloud Clusters (NC2) on Azure and AWS

Achieve effortless app mobility, scale instantly, integrate cloud-native services, and strengthen business continuity and disaster recovery.

Application Mobility & Agility

Move and scale applications easily, shrink infrastructure time-to-value, and enable new services faster.

Built-for Enterprise Workloads

Resilient, secure, scalable, ideal for VDI/DaaS, business-critical apps, databases, private-cloud, edge.

Operational Efficiency & Automation

Intelligent management, lifecycle automation, predictive operations, simplified upgrades.

Vendor-agnostic and Flexible Consumption

Choose your hardware, control your stack, and free your business from monolithic lock-in.

BUILD. MODERNIZE. SCALE.
