

# Seamless Virtual Workspaces

## Anunta's DaaS/VDI Solutions

Ensure Remote Workforce Success  
with High Flexibility and Security

The rise of digital technologies, remote work, and the insatiable demand for flexibility are reshaping the very fabric of how we work. Today, the future belongs to dynamic digital workspaces that empower your workforce to thrive from anywhere.

## Our Services

Anunta offers a comprehensive suite of services designed to optimize your digital workspace, enhance productivity, and ensure security across your organization. The key offerings include:

### Desktop-as-a-Service (DaaS)/VDI

This service provides seamless access to enterprise-grade computing from virtually any device, reducing IT overheads and the complexities of managing physical machines.

### Managed Endpoint Services

These services secure your devices, simplify device management, and unleash the full potential of your distributed workforce.

### Cloud Services

Comprehensive cloud solutions to foster agility, enhance cost-effectiveness, and ignite innovation. We provide top-tier services for migrating, managing, and optimizing various cloud platforms.

## Experience the Power of Your Choice

Anunta offers a comprehensive suite of DaaS/VDI solutions to cater to your specific business needs:

### Packaged DaaS

Experience agility and efficiency with our secure, pre-configured virtual desktops hosted on a public cloud. Packaged DaaS is ideal for businesses seeking a quick and easy solution with minimal IT intervention.

#### Benefits

- Easy to deploy and use
- Pre-configured Windows 10/11 desktops
- Hosted on regulatory compliant platforms
- Minimal IT setup and management required
- Full end-to-end support

## Enterprise DaaS

Enjoy complete control and customization with our fully managed, custom-built DaaS solution. Enterprise DaaS leverages VDI technology to provide on-demand virtual desktops on any public cloud or private infrastructure.

### Benefits

- Fully managed and custom-built solution
- On-demand virtual desktops
- Secure access from any location
- Choice of public cloud or private infrastructure
- Full life cycle provision from design to support

Anunta's DaaS/VDI solutions offer a multitude of advantages beyond deployment options:

### Effortless Deployment & Management

Streamline deployment and ongoing maintenance with our centralized and secure platform.

### Scalability for Growth

Easily adapt your virtual desktop infrastructure to meet your evolving business needs.

### Enhanced Security

Benefit from robust security features that protect your sensitive data and ensure regulatory compliance.

### Improved User Experience

Deliver seamless access to desktops and applications from any device, fostering a productive and mobile work environment.

## Why Partner with Anunta?

Anunta offers a comprehensive suite of services designed to optimize your digital workspace, enhance productivity, and ensure security across your organization. The key offerings include:

### Expertise

Benefit from our team of specialists who tailor and implement ideal digital workspace solutions for your business.

### Security

Your data's safety is paramount. We integrate rigorous security protocols across all solutions.

### Scalability

Our solutions grow alongside your business, providing adaptable resources precisely when required.

### Support

Experience continuous support from our dedicated team, ensuring seamless operation of your digital workspace.
