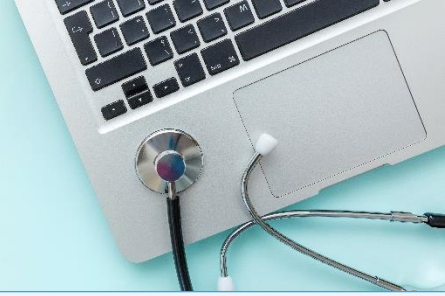
anunta®

Health Check & Diagnostics



In just three to six weeks, Anunta will ensure the optimal performance of your IT infrastructure. We will identify potential issues, enhance system performance, and strengthen security. With our comprehensive evaluation, you will receive a detailed report containing actionable recommendations that improve performance, security, and user experience.

Review & Evaluation — 1 Stage

- Initial Setup & Architecture Review
- Risk Identification
- Tracking & Communication Methodology Review

Configuration & Integration Assessment — 2 Stage

- Infrastructure Evaluation
- Performance Analysis
- Security & Access Control
- Network & Connectivity Review

Remediation — 3 Stage

- System & Configuration Optimizations
- User Experience Enhancements
- Profile Management Optimization
- Application & Image Optimization

At Anunta, we build, scale, and manage dynamic cloud infrastructure and applications to support the end-user experience. Our actionable insights, combined with our expertise and an 88 Net Promoter Score (NPS), will empower your team to immediately enhance performance and security.

Hear From Our Clients

> *With an uptime of 99%, uninterrupted access to critical applications, and a proactive approach to issue resolution, Anunta has ensured an exceptional user experience for us.*
>
> *CEO*
> *A Leading Dental Practice Management Software Provider in Canada*

> *In our transition project, the main success criterion is the business running as is. Once the migration was completed, the phone lines died. No one complained. The end user experience was uninterrupted and seamless.*
>
> *Program Manager*
> *A Leading Healthcare Insurance Technology Provider in the US*
