Cloud Desktops for Remote Working

Many organizations today are actively evaluating incorporating remote working options as an integral part of their operating plan. Allowing their employees to work from home or at the place of their convenience is a top CIO initiative. In the event of any contingency involving travel restrictions or denial of premises, ensuring business continuity, employee safety and data security are critical. Adopting cloud hosted desktops can help organizations keep their business up and running while addressing employees need for secure data access, business applications, communication and collaboration.

Anunta's Cloud Desktops are customized specifically for your business needs and can be setup in less than two weeks. It has a fixed per user per month price and can start with as few as 50 users.
