

Strategic Foundation Building Day 0 Ops

Plan Right, Deploy Right – Building Enterprise Success from Ground Up

Why Day-0 Operations Matter

Day-0 is where architecture is defined, risk is assessed, and readiness for deployment is established. When done well, it prevents delays, supports scalability, and ensures smoother transitions across the remaining lifecycle. Anunta's structured Day-0 approach reduces guesswork during deployment, minimizes operational risk, and builds a foundation that scales.

Our Day-0 Foundation Services

Workload Assessment & Migration Planning

Comprehensive assessment of customer workloads to determine migration strategy, identify legacy systems, and plan modernization with minimal disruption.

Cloud Deployment Design

Architecture deployment models using public, private, or hybrid clouds with focus on platform selection, scalability, availability, and compliance alignment.

Security & Identity Configuration

Integration of IAM, policy-based access controls, encryption protocols, role hierarchies, and identity federation aligned with enterprise governance.

Backup & Disaster Recovery Planning

Configuration of backup and DR mechanisms, defining RPOs/RTOs, identifying data protection tools, and simulating failover scenarios.

Multi-Broker Architecture Planning

Design multi-broker strategies for VMware Horizon, Microsoft AVD environments with user segmentation and application compatibility focus.

Strategic Planning & Roadmaps

The Center of Excellence team ensures solution design per best practices and industry standards while developing strategic planning and roadmaps.

From Strategy to Success with Anunta

Our structured Day-0 approach ensures your enterprise transformation starts with a solid foundation, minimizing deployment risks and maximizing long-term success.

Assessment & Analysis

Comprehensive workload evaluation and migration strategy development

Architecture Design

Cloud deployment models with scalability and compliance planning

Ready for Day-1

Seamless transition to deployment with minimized operational risk

Time Efficiency

Reduces deployment time through comprehensive upfront planning

Risk Mitigation

Identifies and addresses potential issues before deployment begins

Scalable Foundation

Builds architecture that grows with your business needs

Expert Guidance

Utilizes Anunta's deep expertise across cloud platforms

Our Technology Partners

Ready to Build a Stronger Foundation?

Assess your Day-0 readiness with Anunta's experts and lay the groundwork for seamless deployment and long-term success.
