

Seamless Windows 10 to 11 Migration with Anunta's End-to-End Support

Is Your Organization Ready for Windows 11?

With Windows 10 support ending on October 14, 2025, transitioning to Windows 11 is crucial for maintaining security, compliance, and performance. Staying on Windows 10 could expose your business to cyber threats, compliance risks, and rising maintenance costs. Microsoft has already identified critical vulnerabilities that could lead to data breaches and system disruptions. Upgrading to Windows 11 ensures stronger security, improved performance, and long-term support, helping your organization stay protected, efficient, and aligned with industry standards.

Anunta offers end-to-end migration services, ensuring a smooth and efficient upgrade tailored to your business needs.

Why Choose Anunta for Your Windows 11 Migration?

Expert End-to-End Migration Services

From initial assessment to deployment, our team manages the entire migration process, minimizing downtime and disruption.

Comprehensive Day 2 Support

Anunta ensures systems remain secure, updated, and optimized post-migration through proactive monitoring and maintenance—without disrupting user workflows

Enhanced Security and Compliance

Leverage Windows 11's advanced security features with our expertise to safeguard your organization against evolving threats.

Key Benefits of Migrating with Anunta

- 1** A phased rollout approach ensures business continuity during the transition.
- 2** Experience improved system performance and reduced downtime with our proactive support services.
- 3** Stay ahead with the latest technology, enhancing productivity and collaboration across your organization.

Case Study Multinational Energy & Utility Company

Anunta successfully managed the Windows 11 migration for a leading energy and utility company operating in the US and UK. By categorizing virtual desktop pools and adopting a phased migration strategy, we ensured minimal disruption and enhanced security. Key outcomes included **100%** compliance readiness, migration of **over 500 users**, and **up to 30%** performance improvement.
