

## Digital Workspace

Employees today prefer to access enterprise applications across any device, anytime and from anywhere and demand a personalized user experience. The increase in the use of personal devices clubbed with the dynamic change in user preference has created challenge for the IT team. Organizations find it necessary to adopt workplace transformation solutions to help their IT team in addressing the challenges of employee productivity, security, while ensuring end-user experience.

Anunta's Digital Workspace solutions provide you with superior employee experience by transforming the workplace through deployment of enterprise mobility management platforms like VMware Workspace One, Citrix Workspaces, and Citrix Unified Endpoint Management (formerly XenMobile). We bring years of extensive experience in design, implementation, and management of digital workspace technologies, while architecting a secure digital workspace for employees with enhanced productivity.

### Digital Workspace Offers

Anunta's Digital Workspace solution conceptualizes and implements a unified end-point management and a multi-layered mobility strategy for your business that ensures enterprise data security and privacy measures without impacting access and end-user experience.

Workspace ONE™

### VMware Workspace ONE

VMware Workspace ONE is a simple, secure, and intelligence-driven digital workspace platform that delivers and manages data and applications on any device by integrating access control, application management, and multiplatform endpoint management.

VMware Workspace ONE combines and correlates the workspace data delivering integrated insights and enabling automation that helps manage complexity and security without compromising on user experience.

Anunta's deep understanding of Workspace One – the simple, secure, and intelligent workspace platform from VMware provides us the deep domain expertise in implementing and managing workspace solutions across multiple customers globally.

### Citrix Workspaces

Citrix Workspace is a single, secure intelligent work platform that allows IT teams to deliver secure access to data, applications, and other relevant content to the employees according to their role. It helps IT teams in organizing and automating the details that employees need to collaborate, make better decisions, and be productive in their work.

Citrix Workspace provides the IT Teams with an end-to-end visibility and control of the workspace by securely delivering at every layer of the workspace, including endpoint management, content collaboration, access control, virtual apps and desktops, workspace intelligence, and analytics.

Anunta's expertise and years of experience in implementing and managing digital workspace solutions using Citrix Workspace enables you to facilitate fast, secure, anytime, anywhere, and any device access to your workforce.

## How Digital Workspace add value to business

### Superior End user Experience

Uninterrupted access to enterprise applications on any device without any brownouts and downtime resulting in improved end-user satisfaction and productivity.

### Anytime, Anywhere Access

Enable your employees with access to enterprise data and applications from anywhere at their convenience and on any device of their choice.

### Security & Compliance

Seamless integration of devices into security frameworks and robust security policies to maintain complete employee data privacy.

### Highly secure desktop

Compliant with all security and regulatory standards, our solution offers an enterprise-grade security environment, with fully-secured data and applications on the cloud.

### Enhanced Employee Productivity

Enhance your employee productivity by providing seamless and secured access to business applications and data with similar experience as in an enterprise network.

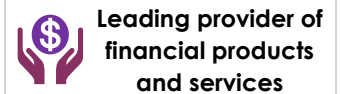

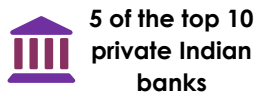

### 24x7 Support

Comprehensive help desk support available 24x7 and a single point of accountability for all end-user performance issues.
