

# Managed Endpoint Services (MES)

Managed Endpoint Services for  
Today's Digital Business

Secure, automate, and scale endpoint operations across hybrid workspaces with proactive support.

As enterprises expand across remote, mobile, and cloud-connected environments, endpoint complexity has become a critical challenge. Fragmented management creates security gaps, inconsistent user experiences, delayed provisioning, and increased IT workloads.

Anunta's **Managed Endpoint Services (MES)** centralizes endpoint operations through automation, unified visibility, and security-first governance. By accelerating provisioning, strengthening compliance, reducing costs, and enhancing digital experiences, MES transforms endpoint management into a strategic business advantage.

Deliver Secure, Seamless Digital Experiences Across Employees, Devices, and Geographies.

## The Hidden Cost of Endpoint Chaos

With employees working across offices, homes, and on the move, endpoint management has become fragmented. The result is an inability to proactively address issues and meet employee needs, leading to inefficiencies, security vulnerabilities, and inconsistent experiences.

## Examples Of Typical Issues Encountered By Enterprises

Limited Visibility of  
Endpoints

Delayed Provisioning of  
Devices/Endpoints

Increased Cyber Security  
Risks

Growing Burden on IT

Inconsistent Experiences  
Across Employees

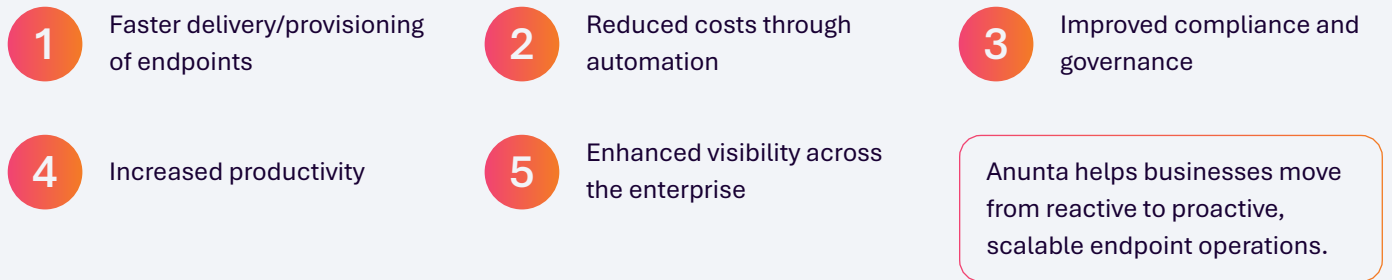

Dependency On Manual  
Administration and Support

## From Reactive to Resilient: The Strategic Case for MES

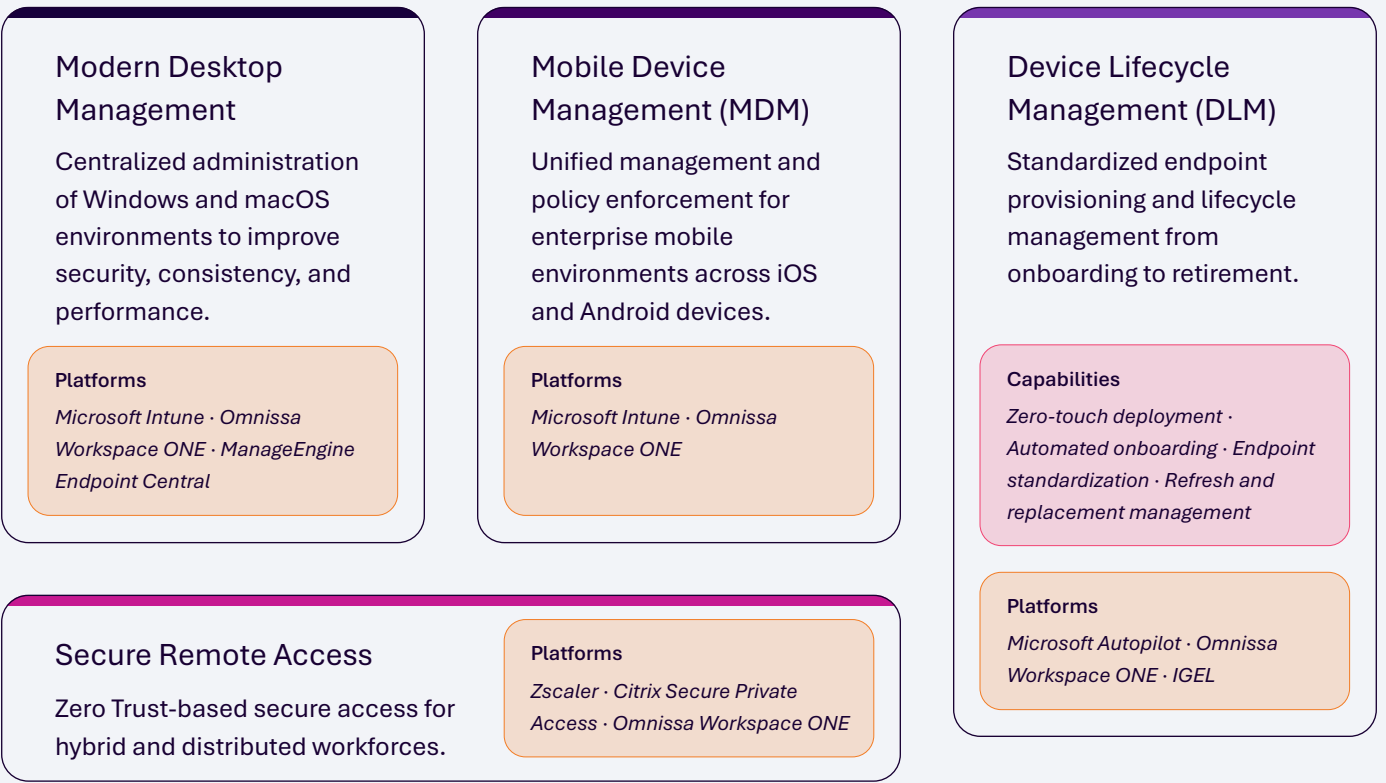

Endpoint management is a strategic business imperative. Businesses that have embraced modern endpoint operations can offer:

## The Anunta MES Framework: What We Deliver

## Full-Spectrum Endpoint Control: Core Services

## Results That Speak for Themselves

### Faster Device Onboarding

Accelerated provisioning and deployment for distributed teams.

### Simplified IT Operations

Automation-driven endpoint management with reduced administrative complexity.

### Stronger Security & Compliance

Consistent governance and policy enforcement across enterprise environments.

### Improved Endpoint Visibility

Centralized monitoring and operational insights across devices and users.

### Better Employee Experience

Reliable endpoint performance with minimal disruption.

## Anunta Advantage: Why Enterprises Choose Us!

Anunta combines endpoint management expertise with digital workspace operations to deliver secure, scalable, experience-led managed services.

### Differentiators

Enterprise-scale endpoint management capabilities

Deep expertise across modern endpoint ecosystems

Security-first operational framework

Strong hybrid workforce management experience

Focus on productivity and digital experience

Scalable managed services delivery model

## Built on Best-in-Class Platforms

### Integrated Endpoint & Workspace Technologies
