

Omnissa Horizon Services by Anunta

Turn Every Workspace into a
Competitive Advantage

Today's CIOs aren't simply managing virtual desktops; they're navigating infrastructure complexity.

Whether you're dealing with rising Citrix licensing costs, infrastructure uncertainty, ransomware threats, hybrid workforce expectations, cloud cost pressures, or limited IT resources, your digital workspace has become a strategic business platform.

Anunta helps global enterprises modernize, manage, and optimize Omnissa Horizon environments, delivering secure, resilient, cost-efficient digital workspaces that enable business growth.

Your Digital Workspace Should Solve Business Problems; Not Create New Ones

Modern Business Challenges

Escalating Citrix
licensing costs

Ecosystem uncertainty

Rising cloud costs

Increasing ransomware
threats

Hybrid workforce demands

AI-ready workplace
initiatives

Growing compliance
requirements

IT talent shortages

User complaints and poor
digital experience

Business continuity
expectations

Enterprise-Grade Digital Workspaces. Built on Omnisca Horizon.

Deliver secure, high-performance digital experiences with a platform for modern enterprises.

Secure virtual desktops and published applications

Hybrid, on-premises, and multi-cloud deployment flexibility

Centralized management and simplified operations

Consistent user experiences across devices and locations

Enterprise-ready security, governance, and compliance

Rapid scalability to support evolving business needs

Technology Delivers Capability. Expertise Delivers Outcomes.

Managing Horizon environments at scale demands specialized expertise. Anunta provides it.

Deploy with Confidence

Accelerate implementation with proven architectures, best practices, and seamless integrations to support business needs.

Migrate Without Disruption

Transition users, applications, and workloads efficiently while minimizing business impact and disruption.

Operate with Confidence

Ensure availability, security, and performance through 24x7 monitoring, proactive administration, and SLA-driven support.

Optimize Continuously

Enhance performance, strengthen security, improve user experience, and maximize efficiency as your business evolves
