How to Prioritize Your Migration Resources

anunta®

ACTION	MUST DO	SHOULD DO	NICE TO HAVE
Identity & Access	Validate identity flows, authentication behavior, and trust boundaries	Refine access policies and conditional rules	Identity policy cleanup
Application Readiness	Validate application behavior under Horizon delivery models	Rationalize app delivery and packaging	App consolidation
User Segmentation	Define user groups by persistence, performance, and access needs	Refine edge cases and specialty users	Persona consolidation
Profile Strategy	Decide persistence model and profile tooling early	Tune performance and resilience	Profile optimization
Infrastructure Readiness	Validate host sizing, storage performance, and scaling assumptions	Optimize resource allocation	Advanced capacity tuning
Networking	Validate real user paths, latency, and hybrid connectivity	Optimize routing and throughput	Traffic optimization
Support Model	Prepare teams for Day 1 and Day 2 behavior changes	Update runbooks and escalation paths	Support automation
Governance & Change Control	Establish ownership and decision authority	Formalize change workflows	Governance tooling
Image Strategy	Establish supported baseline images	Reduce image sprawl	Image standardization
Automation	--	Introduce basic deployment automation	Advanced orchestration
Cost Management	Baseline spend and capacity visibility	Refine usage controls	Cost optimization
