

Nutanix + Anunta

Resilient Infrastructure for Mission-Critical Applications

Zero-Downtime Modernization of Legacy VDI and End-User Computing

In 2026, legacy VDI and endpoint systems undermine business continuity, escalating IT costs and user friction. Nutanix delivers hyperconverged infrastructure (HCI) optimized for high-performance VDI. Anunta provides expert-led, phased migration, ensuring seamless transition with full operational resilience.

Phased Migration Framework: Coexistence Without Disruption

Eliminate big-bang cutovers. Our proven methodology enables parallel operations:

Assess & Stabilize 	Coexist & Validate 	Progressive Migration 	Optimize & Scale 
<p>Comprehensive audit of workloads, risks, and usage analytics.</p>	<p>Run Nutanix in parallel, maintain 100% uptime during testing.</p>	<p>Wave-based shifts prioritized by business criticality (e.g., BFSI compliance, healthcare workflows).</p>	<p>Achieve 30-50% cost reduction through HCI efficiency and right-sizing.</p>

Enterprise-Grade User Experience & Security

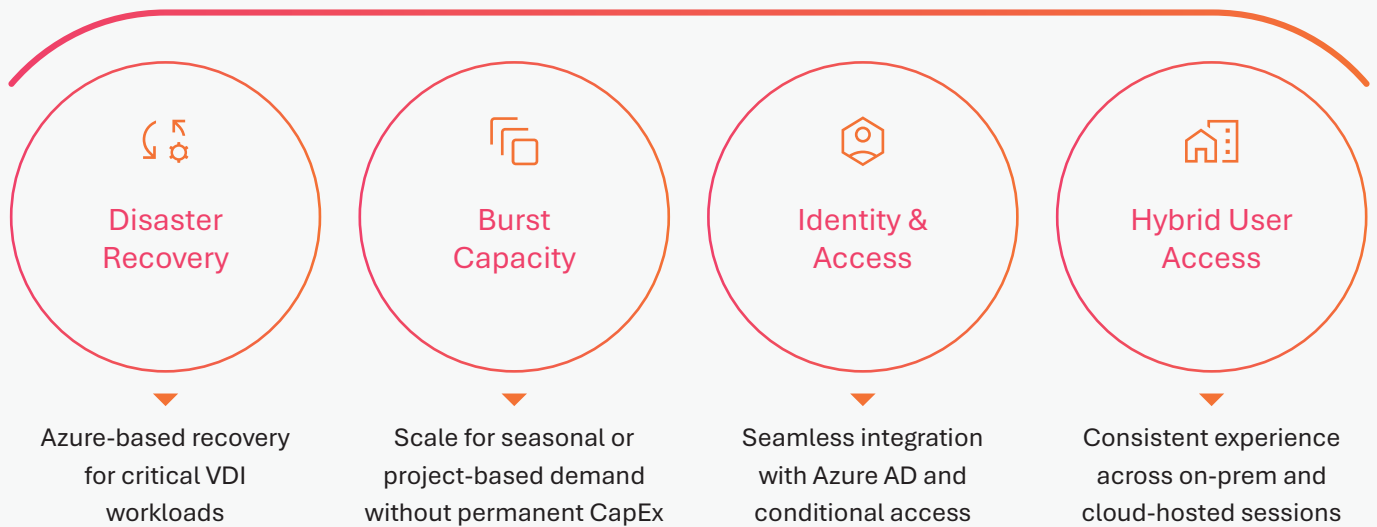

Prioritize productivity with Nutanix's VDI-optimized platform, enhanced by Anunta's managed services:

 Sub-5-second logins with protocol acceleration.	 Persistent, GPU-accelerated sessions for demanding apps.
 24/7 AI-driven monitoring across endpoints, apps, and hybrid environments.	 Zero-trust security integrated with Nutanix Flow for compliance (GDPR, HIPAA).
 Users experience enhancement, not interruption, delivering measurable ROI in productivity.	

CIO-Proven Outcomes with Nutanix + Anunta

Metric	Typical Improvement
Login Times	40%-70% Faster vs Legacy Systems
Support Tickets	25% - 60% Reduction
Session Stability	99.99% Increased Uptime SLA
Image Management	50% Reduction in Image Sprawl
OpEx Predictability	Fixed HCI model with 20% - 40% increased savings
VDI Workload Performance	HCI-native scaling
Hybrid Cloud Flexibility	Seamless Azure/Nutanix integration
EUC Resilience	Disaster recovery in minutes

Azure + Nutanix: What It Means for VDI?

Why Anunta: Your Strategic Nutanix Partner?

10+ years of VDI expertise across Nutanix, Azure, and VMware.

Tailored frameworks for BFSI, healthcare, and manufacturing verticals.

End-to-end ownership: From assessment to Day 2 operations.

Nutanix provides the platform. Anunta ensures flawless execution.

Day-2 VDI Operations

- **Image lifecycle ownership:** monthly patching, version control, and rapid rollback
- **Profile management** with proactive detection and remediation of corruption issues
- **Change governance** during Windows feature and security updates
- **Capacity planning** aligned to hiring, seasonal demand, and offboarding cycles
- **24x7 AI-driven monitoring** across sessions, images, and infrastructure

Our Commitment to IT Leadership

We transform legacy constraints into scalable, future-ready workspaces, safeguarding business continuity while accelerating digital agility.

About Anunta

Anunta builds secure and compliant digital workspaces across private, public, and hybrid clouds for enterprises. Our comprehensive range of managed virtual desktop, managed endpoint & cloud services allow users to access applications and data securely. Our managed services are powered by our platforms, which leverage AI & Machine Learning to automate and optimize operations. We've been consistently featured in the Gartner Magic Quadrant for Desktop as a Service. With over a decade of experience, we've successfully migrated 1 Million+ remote desktop users, boosting security, enhancing workforce productivity, and delivering superior end-user experiences.

Modernize with Confidence

Contact Anunta today for a personalized Nutanix assessment.
