

Mobile Device Management

Simplified Solution for Secure & Efficient Workforce

Enhanced mobility comes with enhanced responsibility. Allowing your employees to work from anywhere using smartphones and tablets is convenient, but is it safe?

Managing a growing fleet of handheld devices is no easy task. You will struggle with:

Unsecured Devices

Lost or stolen devices expose your data. Inconsistent data encryption and weak password policies leave your information vulnerable.

Limited Visibility

Manual configuration, app distribution, and security updates are time-consuming and error-prone.

Decreased Productivity

Inefficient mobile device management can waste valuable IT resources and hinder employee productivity.

Introducing Mobile Device Management

From device enrollment to security and provisioning to application management, Anunta's Mobile Device Management solutions offer everything you need to take control of your mobile devices and empower your employees to work smart and secure.

01 Streamline onboarding and configuring new devices to the company network.

02 Ensure compliance with company policies to prevent the installation of unauthorized apps.

03 Protect corporate data from unauthorized access while also ensuring compliance with industry regulations.

04 Enjoy the flexibility of choosing between on-premises and cloud-based solutions.

05 Adapt to changing device volumes without the need for significant infrastructure investments.

06 Gain valuable insights into device usage and trends to make informed decisions.

Use Cases

 Securing corporate data	 Tracking lost devices
 Managing app deployments	 Ensuring enterprise mobility
 Enforcing device compliance	 Enforcing BYOD programs

The Anunta Advantage

-  Automated workflows and policies
-  Expert services and uninterrupted support
-  Integration with existing infrastructure
-  Centralized device management

Success Story

A health tech startup streamlines device management and implements BYOD for all personal and corporate assets.

Requirements

- Implementing a successful BYOD policy for Android and iOS mobile devices.
- Centralized, secure app management across using SSO.

Solution

- End-to-end mobile device management project for the client leveraging Workspace ONE, a comprehensive digital workspace platform from VMware

Benefits

- Seamless device-agnostic access to applications.
- Increased data security in corporate data access.
- Increased employee productivity with a seamless BYOD policy.
